ROME, Aug. 21.—Troubles growing out of the fighting between French and Italian workingmen at Aigues Mortes, France, threaten to involve grave inter national complications. Popular indig-nation of the Italians is finding vent in demonstrations that are evidently indemonstrations that are evidently intended to coerce the government into demanding an apology from France for the attack upon the Italians and the payment of indemnity to compensate the families of the Italians killed. Riots directed against Frenchmen have occurred in many provincial towns, and the situation is considered exceedingly grave. The most serious outbreak of popular feeling against the French occurred in this city late last night, when a mob attempted to burn the French embassy. Some of the rioters carried cans of petroleum, and did not hesitate to openly declare their intention to use it in destroying the embassy.

The soldiers charged upon them, but the mob held their ground for a time and fought stubbornly, and it was not until several charges were made that they began to retreat, fighting all the time. Forty-five rioters were arrested and many of the mob were wounded by sabres. Rioting in the provincial towns was only quelled by the use of troops, the police being utterly powerless to handle the mob. Further developments are anxiously awaited.

Several hundred workingmen tried to start an anti-French riot late this afternoon, but were dispersed by the police. Several were wounded and many arrested. The mayor has issued a manifesto exhorting the people to remain calm and trust the government for satisfaction of their demands. Disorderly crowds shouted in the streets of the city this evening.

In Genos anti-French demonstrations were in progress throughout the evening. The rioters burned an omnibus and many street booths.

The pain only ceased when the formation, as I was told by the doctors, would pass into the hadder; this of course i did not understand until the doctor explained it to me.

Since treating with Dr. De Monco and associates I am glad to say I have had but one attack, and that was the first week of my treatment with them.
